---

cPanel Starter

cPanel Hosting that's easy, reliable and lightning-fast.

- 1 Website
- 30 GB Storage
- Unmetered Bandwidth

Website Security Deluxe

Proactively secure your site.
Malware scan and removal + ongoing protection.

- Protect one site
- **12-hour response time**
- Unlimited malware removal
- Blacklist monitoring & removal*

- WAF malware prevention**
- CDN performance accelerator***

*Google will blacklist sites that could be considered dangerous to visitors, which makes it nearly impossible for people to find you. We identify and resolve any blacklisting issues, so there's no interruption to your business.
**As opposed to simply scanning for malware that may have already infected your site, our Web Application Firewall (WAF) provides around-the-clock, proactive protection to block malware from ever reaching your website.
***Our Content Delivery Network (CDN) stores your content on multiple servers around the world, which means visitors connect to servers that are physically closer to them. This speeds up your website's performance by at least 50%.
